A volunteer with Labs4Rescue sits with a yellow lab up for adoption at a Branford adoption event. Labs4Rescue is a Killingworth-based dog rescue organization that pulls Labrador Retrievers from high-kill Southern shelters and places them in homes in the Northeast. Since its inception in July of 2002, Labs4Rescue has placed more than 4,000 dogs. The organization is currently seeking volunteers to foster a lab, or adopt one. For more information on Labs4Rescue, visit www.labs4rescue.com.
