HERE THEY ARE - THIS WEEK'S CHAMPIONS!

Gulliver's Travels

We first "met" Gulliver on Labs4Rescue.com. He was found wandering a roadside in Tennessee with two bricks wired to his collar. (Evidently some extremely cruel soul tried to drown this poor little guy.) Thank goodness a kind Samaritan stopped to pick him up and fostered him until a home could be found. Once we read his story, we knew Gulliver belonged in a loving home with a yellow Labrador brother named Riley.

He has been with us since 2002 and is truly a loving, kind little guy who thrives on belly scratches. He will position his body right under our feet to insure an instant scratch! Our Gulliver has had his travels, but he is solidly grounded with our family in Enfield.
